## Research

The following topics have been researched during May, June, July and August; these topics are in response to correspondence from all over the United States, Wales, and Belgium

Emery, Van Horn, Wisner lineages; McClay, O'Rourke lineages, Samuel Boggs; Waldren Cheyney; Anna C. Hinkson; Ruth Mather Thomson of Chester; Pioneer Suspender Company of Darby and Philadelphia; Lenderman lineage; Andrew Van Dike ( Van Dyke ) of Tinicum; Relatives of the Parker Booth lineage; Felix Velott Family, Blue Hill School, Worrell Family; George W. Roosevelt; Sarah Jane ( Epley ) Young; James Weaver; McDevitt and Carlin lineages; Talley and Foulk lineages; Shearer lineage.

The Library has kept a copy of all of the research which has been done on these topics, and it is filed for future research purposes.

The Chester-Upland School District was researched and videotaped in our Library during July and August. It will be aired on cable TV in the future.

We are seeking to acquire old family manuscripts and Bible records and are willing to xerox them if you can bring them in, or we have a 16 mm microfilm machine which is portable and can be brought to you to reproduce these records for our archives. Your attic trunk or old boxes may have some valuable information for future researchers and we are attempting to gather these documents together into one central area for everyone's benefit.
